Strand: Science Alive

Earth's Biomes

Curriculum Level: 4

The **Earth's Biomes** module is designed to support the learning of key ideas within the Science curriculum.

Through reading these texts, students will learn about Earth's different biomes. They will be able to explore the unique attributes of each biome and how animals and plants live together and thrive through adaptation. There are strong conservation links within this module and opportunities for students to create action based inquiries.

After completing this module, it would be expected that students have developed some of the knowledge and skills required to demonstrate success at level 4 of the curriculum.
